Noah Damsky left the meeting at 9:32 p.m.

- a. Motion for the SORO NC to send an email to Los Angeles County Metropolitan Transportation Authority (Metro) in support of the proposed underground heavy rail subway mode of transportation through the Sepulveda Pass because it will carry more passengers than the proposed monorail mode of transportation. The heavy rail mode of transportation is described in the Draft Environmental Impact Report (DEIR) for the Sepulveda Transit Corridor project, released by Metro on June 2, 2025, in the discussion of alternatives 4, 5 and 6 (GB071725-22)
Moved by Jason Plummer; Seconded by Terrence Gomes.

Jason Plummer presented on the proposed public transportation options through the Sepulveda pass with two monorail options and three heavy rail options that would go underground; he mentioned his bias towards heavy rail options but noted WRAC was not supporting options that did not have stops at UCLA; mentioned that monorail stops would be on freeways where

it is loud and there is lots of pollution; he favored any heavy rail over monorail despite the projected completion of the monorail to be faster than heavy rail; he added that he would be amending the motion to fall in line with WRAC's stipulations.

Barry Levine asked about the differences between automated and heavy rail.

Jason Plummer said the automated would have sliding doors at the station which are great safety measures but this option would not include a driver.

Baila Romm asked if there had been any data with regards to earthquake safety with any of these modes of transportation.

Jason Plummer said it is safer to be underground than above.

Baila Romm said she was not convinced but also asked where the statistics were coming from with regards to ridership.

Jason Plummer said Metro did their analysis; it was not a corporation making these projections, it was a government body.

Megan asked about the percentage of time the train is underground; but that in the valley it would basically be above ground.

Jason Plummer said yes.

Joseph Mollaie asked why there was not a Getty Station stop for heavy rail.

Jason Plummer said it was not feasible due to it being so high up.

Joseph Mollaie asked how much was federal money a factor in this.

Jason Plummer said it will be privately funded in part.

Shia Fisher asked about maintenance costs.

Jason Plummer he did not have exact figures but that yes heavy rail would require more maintenance.

Jason Plummer amended the motion to add language to include opposition to the monorail option; Seconded by Stuart Weiss.

Discussion.

Michael Lynn extended the meeting to 9:45 p.m.

Vote on Amendment to add language opposing the monorail options to original motion, so that the motion reads "The South Robertson Neighborhoods Council (SORO NC), a member of the Westside Regional Alliance of Councils (WRAC) opposes the two proposed Monorail Options

(Alternative 1 and Alternative 3) due to their significantly lower ridership projections and lower capacities, and their significantly slower speeds and longer travel times, and supports the proposed underground Heavy Rail subway mode of transportation through the Sepulveda Pass because it will carry significantly more passengers than the proposed Monorail mode of transportation.”
